

Tarsco Bolted Tank®
a TF Warren Company

**FULL SERVICE PROVIDER OF LIQUID AND DRY
BOLTED STORAGE TANK SYSTEMS**

Tarsco Bolted Tank works with clients on a global scale to design, manufacture and construct projects with exceptional quality.

Capabilities and Services

We are leading the industry in engineering, manufacturing, and construction of storage tank systems. Our goal is to provide you with the best value and the most advanced storage tank solution in the industry.

Our in-house engineering department offers our customers the following capabilities and services:

- Tank drawings with the ability to locate all accessories
- Tanks designed to customer's specifications and latest applicable codes
- Approval drawings in Autocad or Solidworks 3D
- PE stamps for all 50 states are available
- Specifications electronically
- Design for any seismic zone, specific wind loads and deck loads and for future expansion
- Tank design calculations and foundation designs are available

Tarsco Bolted Tank's project management staff offers our customers the following:

- Assigned contact through project completion ensuring effective communication and attention to detail
- Planning assistance, scheduling and drawing review
- Preliminary tank layout and confirmation
- Product specification and design criteria assistance
- Contract review, pre-job-site review, and acceptance procedures

We provide the following Construction and Field Services to our customers:

- Complete construction by qualified Tarsco Bolted Tank company crews
- Non-union, prevailing wage and union wages per local requirements
- Post-job service to ensure continued satisfaction
- Field erection crews are factory trained direct employees of Tarsco Bolted Tank
- Our construction crews receive over 120 hours of in-house safety training; this ensures your project is completed safely and efficiently
- Tarsco Bolted Tank has earned an impressive safety record. Our EMR reflects a safety record substantially better than the industry average
